# SEE WHAT YOU'VE BEEN MISSING.

We passionately pursue advanced, innovative technologies that help golfers of all abilities find more enjoyment from the game. Our mission now extends to our new Sungear eyewear line – the ONLY sunglasses designed specifically for golf! Our new Sungear provides the visual performance and protection you would expect plus much more! Our technology and designs were developed with one fundamental goal in mind...to maximize your ability to read greens, make more putts and lower your scores!

## P2X™ LENS TECHNOLOGY: HOW IT WORKS

- Contrary to conventional thinking, our lenses let in more *[of the right]* light than ordinary sunglasses.
- This results in better depth perception, which is especially helpful around the green when reading putts and chips.
- We added a polarizing filter to reduce glare, then added a green flash mirror to better manage confusing short wavelength light.
- Finally, we designed lightweight frames that maximize adjustability, comfort and protection while fully exploiting the benefits of our technologically-advanced lenses.

## FEATURES:

- Polarized lenses reduce glare and better manage light for enhanced depth perception.
- Ultra-light frames to maximize comfort
- Provides 100% protection from harmful UVA, UVB, UVC rays.
- 8 Base lens configuration design provides maximum eye coverage.
- Includes Lens Cloth, Carry Pouch, and Hard Case with hanging clip.
